Ligra srl - Visual Communication Supplies

Forty years leading the market

Ligra's history begins in June 1968, when Modern Plastic was founded, company specialized in the production of plastic articles on behalf of important and renowned trademarks, among which FINS (Fabbrica Italiana Nuovi Schermi), the only Italian producer of projection screens. Technical skills and the proven partners' experience bring soon excellent results which are then awarded in 1975 with the prestigious European Commerce Oscar, the so called '**Gold Mercury International Award**'.

In 1976 the company creates an industrial production line destined to the manufacturing of screens for amateur projection, shortly becoming world leader even on behalf of third parties: **Techno, Apex, Optex, Bonum, and Jessop**. The annual production consists of approximately 150,000 screens and is totally absorbed and managed by national distributors located in over 30 countries world-wide.

At the end of the 80s springs the idea **to expand the range of products**, targeting a wider market and detaching from the amateur sector in which the company was strongly rooted.

The development project took place in 1994 with the foundation of Ligra, by integrating the now consolidated amateur screens line with a complete range of supports for visual communication both in the educational & conference sectors and in the home theatre sector.

A Company heading to the future

Thanks to a 40-year-long experience in the AV segment, **Ligra can supply a very large selection of Audio Visual, Office and Educational equipments**. Ligra covers **an operational surface of over 5000 sq.m.**, subdivided into one production units and a large warehouse to store the packaged product. The production system is focusing **QUALITY SAFETY** and **DURABILITY** as key features of the full range of products. Our qualified technical department is at your full disposal for any kind of support you shall require. The logistic department is responsible for durable packaging of the goods in order to withstand international deliveries world wide. **All products are CE certified and we offer 24 month warranty on screens and 5 years on electric motors.**

Av-Pro

Beamers

Ligra is an authorized partner and distributor of some of the major beamer brands. Among the others: **BenQ** (Laser, Installation, LED, Educational beamers), **NEC** (Desktop, Network, LCD, DLP and Educational beamers) and **Panasonic** (Home Cinema, LED laser, Installation, LCD, Educational beamers). From the outfitting of a small meeting room to the setup of a large arena show, Ligra is the ideal partner to choose the best solution fit for the customer's needs.

Projection screens

Ligra offers a wide range of projection screens: **portable for rental** (Presenter – the world's smallest table screens - and Quickfold, ideal for temporary installations in large environments), **manual** (with the exclusive CSR – Controlled Screen Return – system), **motorized** (both tensioned and not tensioned, fit for wall or counter-ceiling mounting), **for special installations** (such as the Cobra range with an upwards unrolling system) and **for Home Theatre** (with rigid frame).

Large Format Display

Ligra is a **Philips** partner for the distribution of Large Format Displays such as **interactive screens** (touch monitors and totem displays) and **digital signage systems**, while we rely on **NEC** for **videowall and field analyst** solutions.

Document cameras & Videoconferencing

Ligra is a **Lumens** partner for the distribution of hi-end visualizers and document cameras, fit for educational or for professional use (ie. Medical) and a **Panasonic** distributor for videoconferencing devices.

Supports

Ligra distributes the **Chief** supports for monitors and TVs among a wide range of other installation solutions.

Educational

Since 2008 Ligra is the **sole distributor** of the **Mimio** interactive systems in Italy. Mimio, a part of the Sanford-Newell Rubbermaid portfolio, is one of the most prominent producers of equipment for education. Among the products of the MimioClassroom: **MimioTeach** (a device that turns any surface into an interactive whiteboard), **MimioView** document camera, **MimioVote** voting system, **MimioCapture** to convert real-life ink into vector graphics, **MimioMobile** to work with the classroom iPads.

Since 2012, Ligra is a **Panasonic** partner for the distribution of the **Elite Panaboard** interactive whiteboards in Italy, with capacitive (T880) or IR technology (T580).

Ligra produces and distributes a wide range of products for the educational market: short-throw and ultra-short-throw beamers for iWBs (**Panasonic**, **BenQ**, **NEC**, **Hitachi**), interactive monitors (**Philips**, **C-Touch**, **BenQ**) and **MoviBoard – FlyBoard** trolleys. Moreover, Ligra is the **sole distributor** for Italy of the **Monarch LapCabby** range of units for secure and recharge laptops, netbooks and tablets. We are a partner of **Toshiba** for the distribution of laptop computers for the educational market.
